

To whom it may concern. I am asking that you please reject the NAB's petition 04-160. I am a xm satellite radio customer and I geatly benefit from the weather and traffic updates. I choose to pay for satellite radio so that I may have all the channels I want anywhere in the country, and when Itravel it is a great benefit to me to know what the traffic and weather situation is in the cities I may be traveling through. I urge you to please reject their petition, and I thank you for your time
